

(INSIGHTS OF STAKEHOLDER PRESENTATION)

- SHORT SUMMARY -

Dataset Overview

I analyzed past 2 years data (2013 – 2014) with 700 transaction totalling \$118M in sales and \$16.9M in profit. The analysis reveals strong growth and clear profit drivers that can guide next year's strategy.

Key Insights for Business

- While Enterprise segment is in net loss (-\$1.5M), Government delivers 67% of total profit.
 - ✓ **Recommendation** : Should prioritize Government contracts and review Enterprise discounting policy.
- USA & Canada together contribute over \$35M, meanwhile France and Germany are secondary.
 - ✓ **Recommendation** : Should double marketing spend in North America
- Montana & Velo also perform well, but Amarilla performs a bit low.
 - ✓ **Recommendation** : Can increase Paseo inventory and promote as premium.
- Profit jumped from \$2.62M (2013) to \$8.79M (2014). September is peak season (profit of \$2.8M) and February is low.
 - ✓ **Recommendation** : Can plan inventory and staffing for Q3 peak.

Recommended Next Steps

1. Reprice Enterprise deals due to current discounts causing loss.
2. Allocate 60% of 2015 marketing budget to Government segment in USA/Canada.
3. Launch Paseo-focused campaign before September peak season
4. Deep – dive into February low sales, is it seasonal or operational?
